Professional Summary

Full Stack Developer with 2 years of experience in Angular, .NET, and Azure. Skilled at navigating complex challenges, leading migrations, mentoring freshers, and delivering reliable, efficient solutions under tight timelines.

Experience

Software Developer, Chubb – Hyderabad, India   Jul 2023 – Present

- Played a pivotal role in delivering an **award-winning POC – Claims Watch** (SRE WATCH), collaborating across roles to build an intuitive UI and backend integration that enabled real-time insights into application reliability and system performance.
- Led **Azure Key Vault** migration and addressed critical SonarQube issues to improve code quality and security across services.
- Contributed to the upgrade of multiple applications from Legacy Azure App services to latest version Improving performance, security, scalability, supporting smoother CI/CD transitions and improved deployment workflows.
- Developed a self-service tool that enabled business teams to manage key config values independently, reducing deployment cycles and developer overhead.
- Implemented bulk upload functionality for use cases like user-roles and relations mapping, allowing business teams to execute large-scale operations efficiently via Excel templates.
- **Mentored freshers** across teams, helping them onboard and contribute effectively.
- Collaborated closely with leads and product owners across diverse Lines of Business to deliver high-impact results, achieving over **80% Automated Adjuster Assignment** across 5 Lines of Business with a remarkable accuracy rate of 98%.
- Received **Gold Excellence Award** for impactful delivery and leadership.

Software Developer Intern, Chubb – Hyderabad, India   Aug 2022 – Jun 2023

- Helped deliver a **quick-turnaround dashboard** to replace a broken Qlik dashboard, ensuring business teams restored essential analytics for business continuity.
- Gained hands-on experience with software development best practices, agile processes, code reviews, and production systems.
- Delivered production-ready features under guidance, actively participating in sprints and releases.

Full Stack Developer Intern, Digi Bros   Jan 2022 – Mar 2022

- Developed a responsive web-based invoicing and inventory management system tailored for a jewelry business using **PHP**, **JavaScript**, **MySQL**, and **Bootstrap**.
- Implemented core features such as **item creation**, **stock updates**, **invoice generation**, and **user authentication** to streamline day-to-day operations.
- Integrated **HighCharts API** to deliver interactive, real-time **sales and inventory dashboards**, enabling data-driven decision-making.
